meliopayments.com

The screenshot shows the Melio website's main landing page. At the top, there is a navigation bar with the Melio logo and links for Business, Accountants, Partners, and Pricing. On the right side of the navigation bar, there are links for Sign in and Start now. The main heading reads "Pay your bills with a credit card." Below this, a sub-headline states: "Use your credit card to pay vendors, contractors and all your business bills—even where credit cards aren't usually accepted*. Earn rewards on purchases to use on just about anything." A "Start now" button is positioned below the sub-headline. The central part of the page features a dark credit card with a gold chip and the number "4546". Surrounding the card are several floating callouts. On the left, five callouts show payment amounts with green checkmarks: \$1,207.00, \$3,200.00, \$2,430.00, \$2,430.00, and \$1,670.00. On the right, five callouts show rewards earned with yellow plus signs: 10,170 Miles, 11,490 Miles, 9,870 Miles, 15,432 Miles, and 2,470 Miles.

#5 Great TikTok SEO Tip

Have you heard the phrase “I’ll just search it on TikTok” in the last week?

Gen Z are now using TikTok as a search engine **more than they use Google** so you **NEED** to be producing content that is searchable

1) Use key search terms in onscreen text AND in the caption. It's quality over quantity here, 1-2 search terms max.

#5 Great TikTok SEO Tip

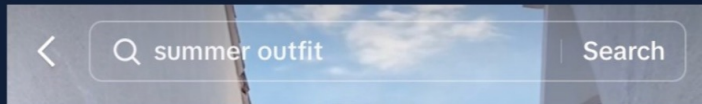

2) Research the most popular search terms to use with software like Keyword Chef or Semrush

3) Be **sneaky** and hide a list of SEO search terms in your video by shrinking the text and camouflaging it with colour or dragging it offscreen.

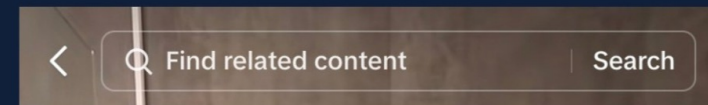

It won't be visible in your content but the Algo will recognise the keywords.

#5 Great TikTok SEO Tip

An easy way to tell if your videos are SEO optimised is checking the search bar suggestions at the top of your video watch screen. Is it suggesting a search? Is it relevant? Could it be better?

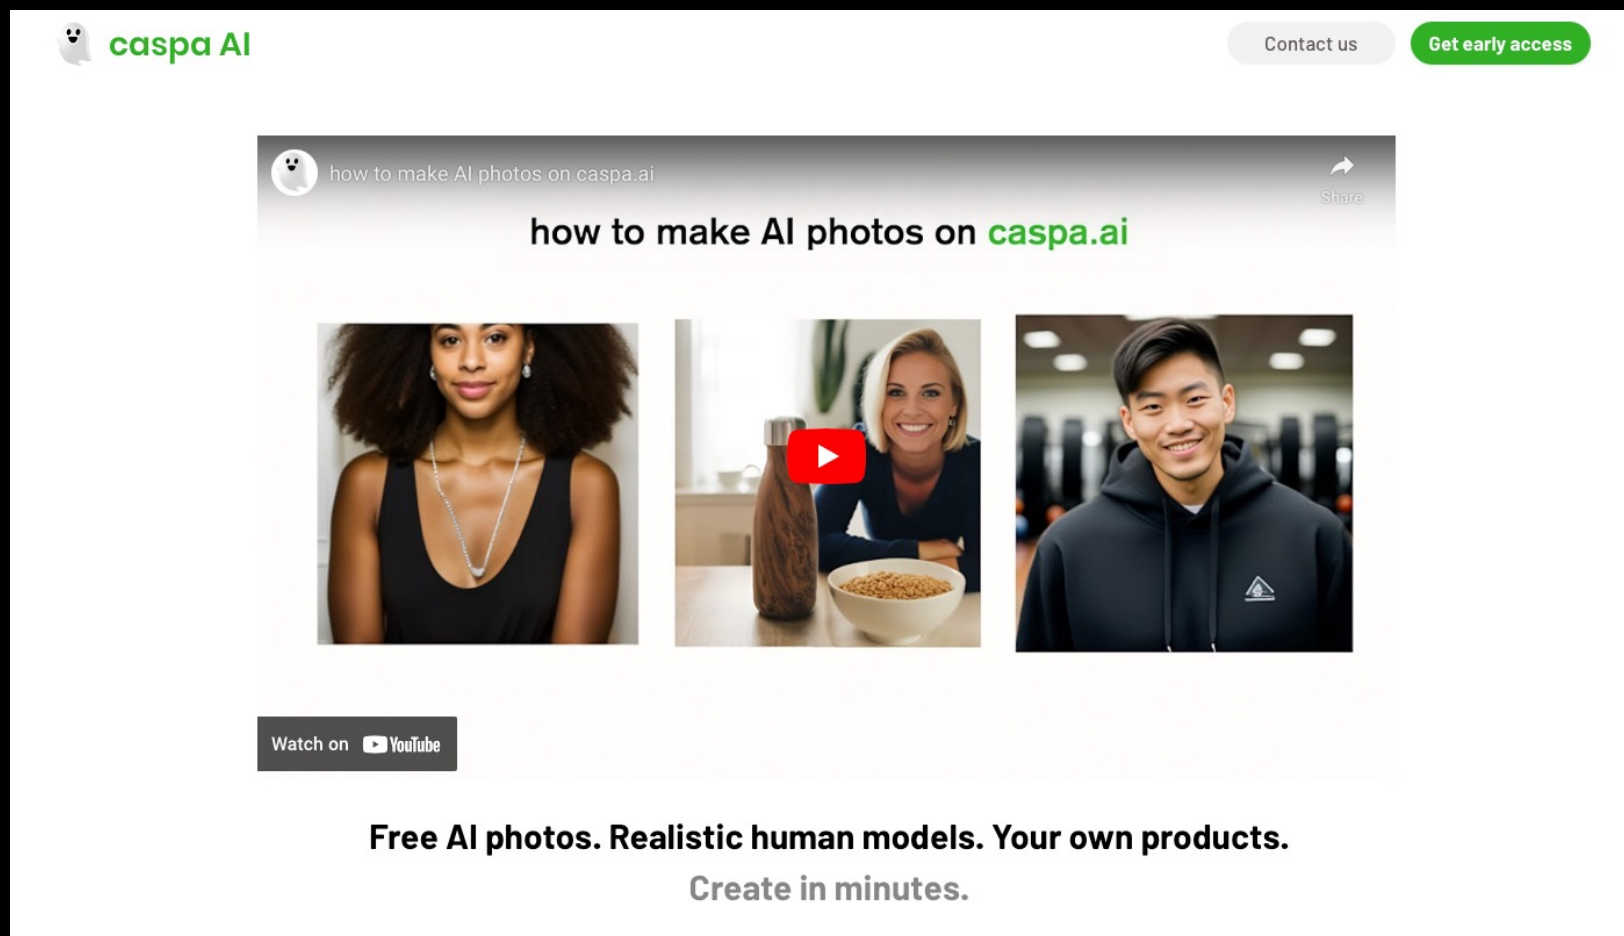

If it says "Find Related Content" your SEO has not worked. Back to the drawing board to test, test, test more keywords

#6 Add your product in a scene with a realistic human model with AI

caspa.ai

The screenshot shows the caspa AI website interface. At the top left is the caspa AI logo. To the right are buttons for 'Contact us' and 'Get early access'. Below the navigation is a video player with the title 'how to make AI photos on caspa.ai'. The video player shows three AI-generated human models: a woman with dark curly hair, a woman with blonde hair sitting at a table with a bowl of cereal, and a man in a black hoodie. Below the video player is a 'Watch on YouTube' button. At the bottom of the page, the text reads: 'Free AI photos. Realistic human models. Your own products. Create in minutes.'

#7 Increase your domain authority with this hack from Empowery

empoweryseo.com

Domain Authority is a critical aspect of ranking:

Domain Authority (DA) is a search engine ranking score developed by Moz that predicts how likely a website is to rank in search engine result pages (SERPs). Domain Authority scores range from one to 100, with higher scores corresponding to greater likelihood of ranking.

Domain Authority is based on data from our Link Explorer web index and uses dozens of factors in its calculations. The actual Domain Authority calculation itself uses a machine learning model to predictively find a "best fit" algorithm that most closely correlates our link data with rankings across thousands of actual search results that we use as standards to scale against.

#7 Increase your domain authority with this hack from Empowery

empoweryseo.com

CONCLUSIONS

YOU COULD HOST YOUR OWN BLOG AT THE EXPIRED DOMAIN AND THEN ADD LINKS TO YOUR TARGET URL.

WE DON'T KNOW FOR SURE IF THE RANKING INCREASE IS FROM RE-DIRECTED DOMAINS.

BANKLINKS THAT DON'T INCLUDE ROOT DOMAIN ARE NOT COUNTED IN BACKLINK SITES LIKE MAJESTIC.COM OR AHREFS.COM SO IT'S HARD TO TELL IF IT IS HAVING THE DESIRED IMPACT.

HOWEVER, THE RANKING INCREASE IS UNDENIABLE.

SEO IS ALWAYS IMPORTANT FOR YOUR WEBSITE - PAY ATTENTION

THE BACKLINK QUALITY MAY NOT BE HIGH, BUT THE SHEER NUMBERS COULD BE HELPING THE DOMAIN AUTHORITY.

Question: What is the trick to open the dispenser? I can't seem to figure it out.

Answer: If by dispenser you mean the small cut out made in the side of the box? U can just run a sharp edge along the cut and that should do it. If not open and remove the rolls and open it from inside.

#13 Check your Leaf Nodes (Amazon's version of category browse node on backend)

- Only Seller Central can see them – you can't tell if you have them complete or not
- Sometimes when we create a listing and assign a category, the leaf node is not assigned.
- It is vital to have activated Leaf Nodes for maximum search visibility
- Not limited to just 1. Can get multiple leaf nodes to increase search and rank visibility
- Ask your SAS rep for an IDQ report to see what is missing (and your score)

“A high Amazon IDQ score is actually a requirement for good ‘findability’ of products on Amazon. Strong content and a high IDQ score have a big impact on your results.”

– Martine Kevelham, CCO at Incubeta Maze-One.

#13 Check your Leaf Nodes (Amazon's version of category browse node on backend)

The Amazon system automatically gives each product an IDQ score on a scale of 0 to 100. A product must be ranked with an IDQ of 90+ to be included in Amazon's algorithm

Components to Achieve a High IDQ Score

Your product detail page must have:

- At least 5 bullet points
- At least 5 high-resolution images
- At least one review of 3 stars or more
- A+ content
- Categorized in correct Leaf Node - the 3 main types of nodes:

ROOT NODE – “Shoes”

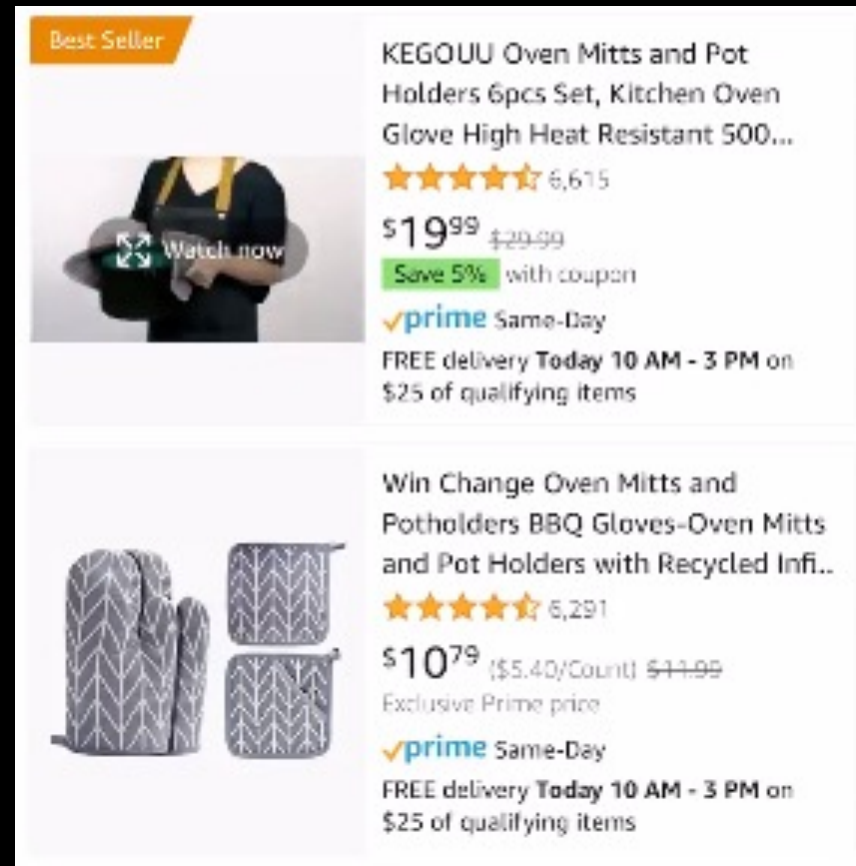

BRANCH NODE – “Men's”, “Children's”, “Women's” > “Heels”,

LEAF NODE (no 'children' nodes that follow it) – “Sneakers”, “Boots”, “Open-Toe”

#14 How to control which video appears in the Amazon Search Engine Results

Video in the SERPs on Amazon is brand new and seemingly chosen at random

The screenshot shows two product listings on Amazon. The top listing is for 'KEGOUU Oven Mitts and Pot Holders 6pcs Set, Kitchen Oven Glove High Heat Resistant 500...'. #14 How to control which video appears in the Amazon Search Engine Results

We know several things about videos in SERPs at this moment:

- The clip lasts 7 seconds when the user stops scrolling on listing.
- The 7 second clip that plays is seemingly chosen at random.
- There is no audio unless the user clicks "Watch Now".
- Video is 16:9 and displays smaller than the main product images.

#14 How to control which video appears in the Amazon Search Engine Results

Here's a workaround to get the clip you want to play:

- Create a short clip that showcases your product.
- Upload this clip under "Catalog" --> "Manage and Upload Videos"
- Remove all other uploaded videos for your listing.
- Wait a few hours for the new clip to appear in the SERPs.
- Re-upload your initial videos. It seems Amazon pulls from the oldest video on the listing and this will ensure all your old videos will still be there.

HEXA, a 3D visualization platform that uses artificial intelligence (AI) to create digital twins, announced a new initiative with Amazon that will allow its selling partners to access Hexa's proprietary immersive operating system to create and display applicable 3D images, immersive 360 viewing, virtual try-on capabilities, and augmented reality (AR) content on their Amazon product pages.

All Amazon sellers need to do to access this high-tech tool is insert their Amazon Standard Identification Number into Hexa's content management systems. This will then allow them to automatically convert images into 3D models.
